

MicroBioLogics

MicroBioLogics Microorganism Biosafety Levels

All microorganism products distributed by MicroBioLogics have a biosafety level (BSL) of 1 or 2. MicroBioLogics adheres to the BSL level designation as determined by ATCC® for products where ATCC® supplies the source culture and the American Biological Safety Association for all other strains. Responsibility for safe handling of biological agents ultimately rests with the user and all infectious materials should be handled under the supervision of a competent and knowledgeable microbiologist. For further information on regulations governing biohazard waste (sometimes referred to as medical waste) visit the Environmental Protection Agency's Web site at www.epa.gov/epaowser/other/medical and/or see the Web site of the CDC Office of Health and Safety at www.cdc.gov/od/ohs/biosfty/biosfty.htm.
