

September 2016

Dear Microbiologics Customer,

The name of Microbiologics product 0125 (derived from ATCC[®] 32857^{™*}) has been changed from *Kloeckera apiculata* var. *apis* to *Hanseniaspora guilliermondii*.

ATCC reported to Microbiologics that the name of ATCC[®] 32857^{™*} was update to reflect new naming conventions adopted by the International Botanical Congress after January 1, 2013.

The new naming convention moves away from the dual naming system in mycology that was based on reproductive stages. The new system no longer permits the use of the anamorph state; only the teleomorph state is listed as the primary name.

Sincerely,

Kali Sorum RM (NRCM)
